Speak up with symbol-based AAC

Not being able to speak isn't the same as having nothing to say. Children, teens and adults who can't speak can use this Augmentative and Alternative Communication (AAC) app for iOS as a daily communication tool and to build language skills. From the first time someone opens the app, a few taps are all it takes to start talking to the world.

TODD VISUAL SCHEDULE

Children with Autism: A visual schedule is a wearable picture-based scheduler designed with children and adults with autism in mind.
