

# Rosehill School Impact Report Cricket

# Key Learning Objectives

---

**At the end of the project pupils will:**

- ❖ Have access to new activities
- ❖ To develop table cricket skills
- ❖ The activities helped to promote and develop:
  - ❖ Team work
  - ❖ Physical development – gross motor skills
  - ❖ Communication, interaction and interest
  - ❖ Personal, social and emotional development
  - ❖ Problem solving
  - ❖ Self confidence
  - ❖ Sensory regulation
  - ❖ Be able to access the community with confidence

# Impact on Children and Young People /Pupil Voice

I feel happy playing table cricket

I did table cricket last year and I'm proud I was able to remember some of the rules and signals of the scores

Table cricket is great! I love winning!

Going to Nottingham university is so cool!  
It was nice to meet some new people from other schools!

# Staff voice of the experience

---

Pupils have grown in confidence since starting table cricket, their knowledge and understanding has grown, acknowledging the different rules and routines.

Pupils are happier being out of the classroom environment learning and exploring new activities.

Pupils are excited to go to cricket every week, to access the community doing something new, going on the minibus, chatting with new and old friends and doing an activity they are beginning to love and combine fun, motor skills and teamwork together.

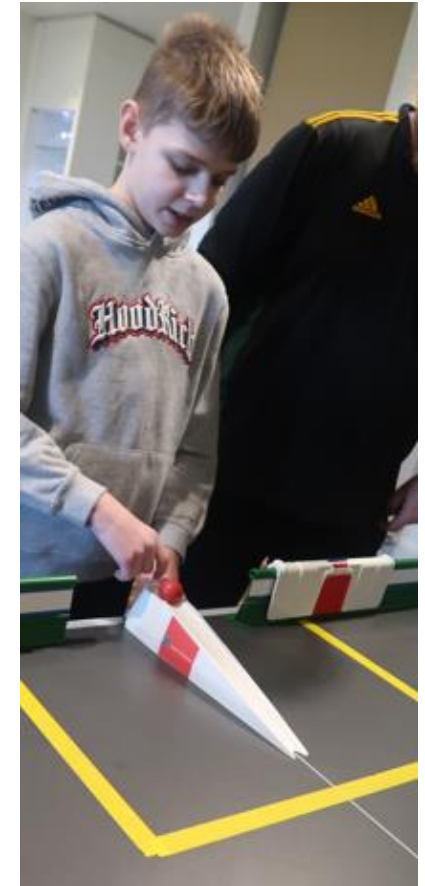

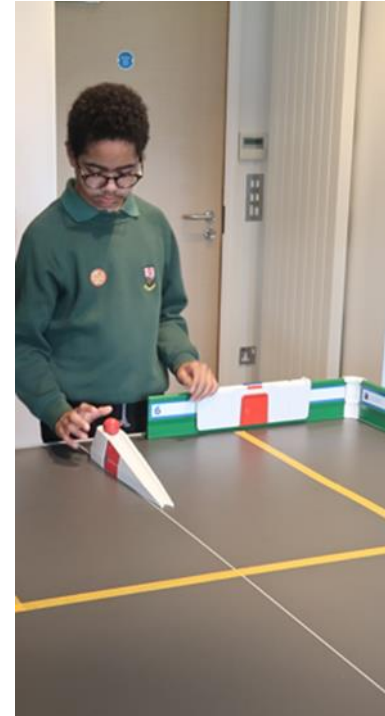

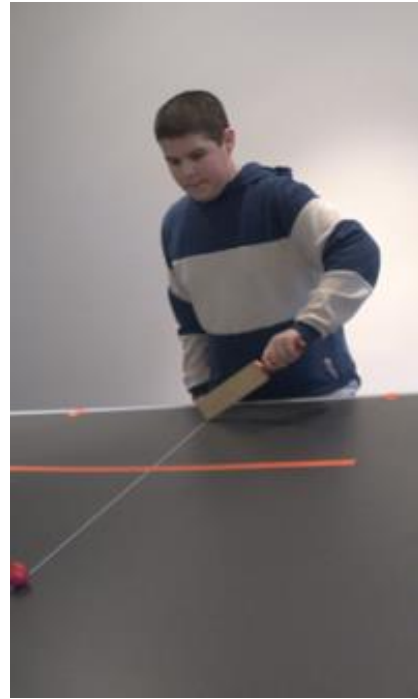

The children benefit so much from the whole experience. It has brought a lot of joy and being rewarded with an activity they can access and create new memories and potentially hobbies outside of school is fantastic.

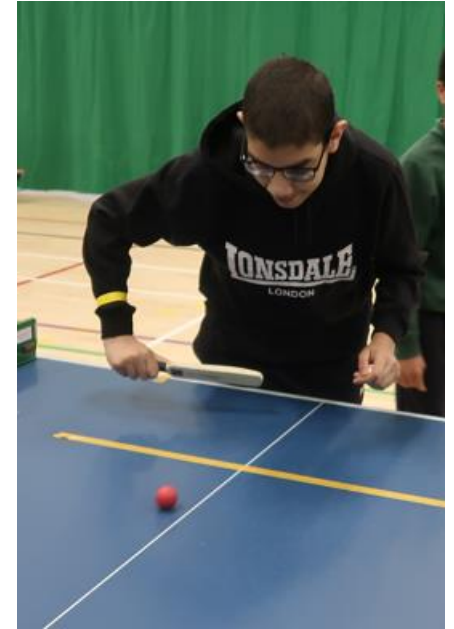

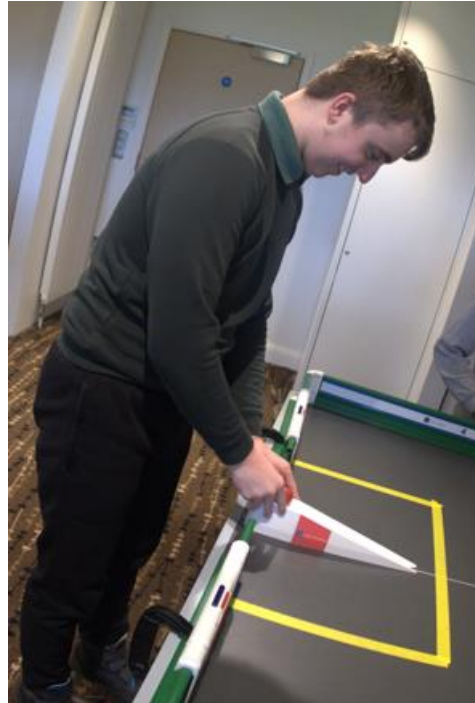

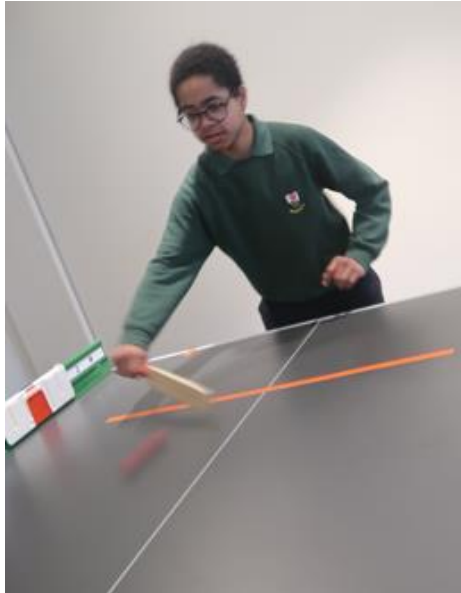

# Impact through photos

# Next Step's:

1

To have more opportunities for the pupils to try activities within the community with staff and pupils

2

To develop activities to support outdoor learning, teamwork and community skills

3

To push for these activities to be explored within team meeting as every child was interested, as it was out of the usual comfort zone of school/classrooms, being out at the cricket ground really helped self regulation and communication as well as interest and teamwork.
